

Project: Broadband Deployment

Recipient: West Valley City

Location: West Valley City, Utah

Purpose: This project will expand the Broadband fiber-optic network within West Valley City. Most current networks operate on a copper wire infrastructure that limits the speed and amount of information that can be transferred. Currently, the broadband network covers about 10% of the City. The requested funds will increase the City's coverage to provide enhanced telecommunications service to businesses and residents.

Amount: \$750,000
